

Career Acceleration program in

Robotic Process Automation (RPA) - Automation Anywhere Essentials

About LetsUpgrade

letsupgrade.in

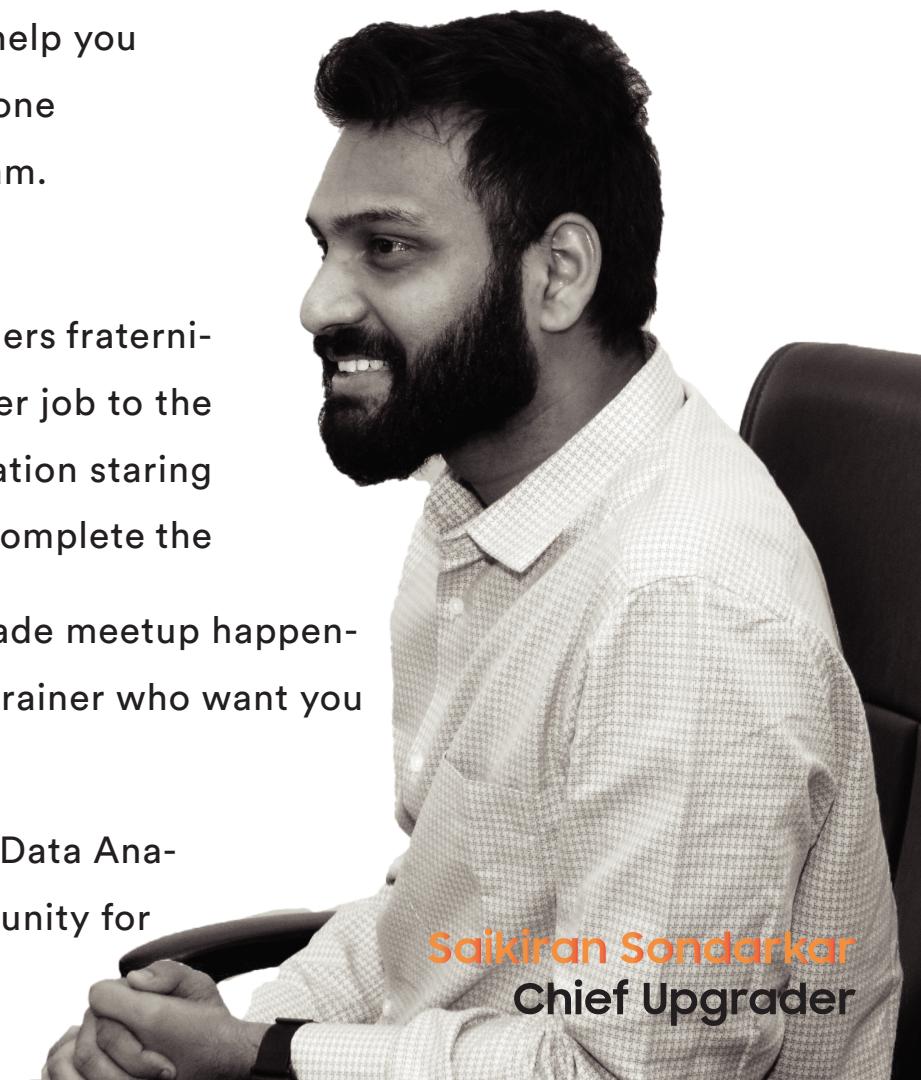

LetsUpgrade is an open community centric education where we believe upskilling of a person happens in offline & online learning session with our disruptive project based learning approach, where a student is a part of a big community of co-upgraders and trainer is there to help you solve the problems in the league of achieving excellence in disruptive technology careers of future.

At LetsUpgrade from the start we make you grow in teams and help you upgrade yourself with the industry developed programs, one on one mentorship sessions, job assistance during and end of the program.

We are on a mission to serve the best to our students, to our trainers fraternity in a fair trade manner, where an end trainer is not losing his/her job to the online education and the end student is not losing his/her motivation staring screen and not making it through the upgrading cycle hoping to complete the

If you are reading this then we request you to attend a LetsUpgrade meetup happening near you and see if you love our learning pedagogy with our trainer who want you to upgrade in your careers.

Yes Go google the next meetup happening near you in Business Data Analytics and build a project in two hours with our trainer and community for free.

Saikiran Sondarkar
Chief Upgrader

ONLINE + OFFLINE LEARNING METHODOLOGY

letsupgrade.in

A photograph showing a group of approximately ten people, mostly young adults, gathered around a table in what appears to be a workshop or classroom setting. They are all looking at laptops, suggesting they are participating in a collaborative online or offline learning session. The environment looks casual and focused.

Our Community trainers can turn abstract concepts into simple everyday examples anyone can understand. Once you understand the concept, what's next is to use them to build real things. When you apply the concept to something real, you'll remember what you learned.

Great to be part of the meet-up. Meet new people and got exposure to the emerging technology.

- Tanvi Mittal, Mumbai

Nice. Trying to explain from more of a layman perspective since it's a complex tech to explain over a session
Good job.

- Kader Mohideen Fasid, Chennai

FREQUENTLY ASKED QUESTIONS

letsupgrade.in

Why is this course relevant today?

RPA is becoming an increasingly popular technology in modern enterprises. Industries like banking and finance, healthcare, insurance, and telecom are adopting RPA to allow employees take a step back from those monotonous tasks and take advantage of the employee's unique, human abilities. The pay for people with these skills is quite high in comparison to other job categories. Demand for people skilled in RPA is set to skyrocket!

What kind of community will I find in this course?

Our RPA-Automation Anywhere program attracts eager learners who are as passionate about growing and launching a new career as you are. Their backgrounds span professions in Development, Management, Team leads, Education, Banking, and many other fields. The LetsUpgrade experience can create lasting friendships, collaborations, and professional opportunities that will support you throughout a lifetime of discovery.

What practical skill sets can I expect to have after completing this course?

- Expert-led instruction in RPA, tools, and best practices.
- Dedicated Career guidance to help you navigate your personal job search experience, from technical challenges to salary negotiation, and more.
- Access ongoing Letsupgrade networking opportunities to connect with experts, employers, and potential collaborators around the world
